

WebXam

What is WebXam?

WebXam online examination solution provides a highly scalable and secure engine that manages the entire examination lifecycle online with minimal administrative efforts. It offers flexibility for exams of any subject and offers a detailed analysis of results of each evaluation. The built-in online proctoring features also eliminate the need for human invigilation.

Solutions from WebXam:

- Web-based online test: The web-based test software is accessible from anywhere at any time and provides an easy-to-use interface to give or take online tests.
- Desktop platform: The desktop platform is accessible from anywhere at any time on Windows and provides surveillance of the examinees for certification reasons.
- Platform for test centers: We have a partner network of test centers which are tried and tested through having delivered a wide range of different test types operating in over 200 cities in 70 countries and with 10,000+ seats.

Main features of WebXam:

- Integrated Application Process
- Exam Lifecycle Administration
- Question Management
- Customization
- Automatic Exam Generation
- Autograding
- Online Proctoring
- Data Security
- Multi-language
